

Innovation through experience

# David Software

## David Software

The David Software range is designed to complement the Geller cash register range. It manages all aspects of programming and configuration and has an optional module designed to provide back office/head office sales reporting.

The software can be used to program the range of Geller machines, as a simple backup tool or for adding new barcode products.

Communications can either be made by RS-232 (serial), ethernet or via modem (model dependent).

The software is very simple to use and can be customised to individual customers requirements.

## David Sales Manager

David Sales Manager software is single or multi-site and provides sales, profit and management information collated from all points of sale onto a back office or head office PC.

Low-cost, yet a sophisticated reporting program that is simple to use and produces clear, concise management reports in graph and/or table format which can be printed, viewed or exported. David Sales Manager works in-house or multi-site with no limit on the number of ECR terminals or sites.

**Available to buy or rent with support.**

## About CRS-Ipswich

CRS is a family run business that has been supplying cash registers, EPOS systems & scales for over 35 years to businesses throughout Suffolk, North East Essex & South Norfolk. For over 30 years we have been a Geller dealer.
