

Innovation through experience

# SX-595

**An ECR from the SX Professional Series**

Up to 20,000 product lines, barcode scanning and stock control make the SX-595 the ideal choice for today's independent retailer

- Barcode scanning with up to 20,000 items
- Graphic logo on the top of the receipt
- Two sided alphanumeric display

**SMART SYSTEMS THAT DO MORE - COST LESS**  
**GELLER ELECTRONIC CASH REGISTER TERMINALS**

# Exceptional value for money, the SX-595 is a complete stand-alone scanning system with stock control for the price of a cash register. The SX-595 incorporates a host of superb retailing features from which you can choose the ones that meet the individual needs of your business.

## Drop and Load Silent Printer

The SX-595's thermal printer operates at 13 lines per second. The hi-tech 'drop and load' mechanism with separate 58mm thermal receipt and audit rolls, simplifies and speeds paper roll changes and eliminates paper jams. There is no ribbon to replace or fade, so receipts of the same exceptional clarity are produced every time. Your company logo or special design can be printed on the top of each receipt.

## Low cost Scanning

The SX-595's memory can hold up to 20,000 sales items as price look ups. You can enter sales manually on the keyboard, or you can scan bar coded items for high-speed sales. A range of low cost scanners is available for the SX-595. On request, you can have a pre-loaded general retailing file containing 17,000+ popular products.

## Multi-buy/Mix and Match

Items may be discounted when a certain quantity is bought. Additionally, mixed item promotional offers can be created. Details are printed on the receipt and audit and the word 'Offer' flashes on the display when the last item in the offer is registered to draw the customer's attention.

## Shelf Edge Labels

SX-595 automatically generates shelf edge labels containing price, product name and bar code when new products are entered on the system or when prices/product descriptions are changed.

## Age Verification

If you sell tobacco or alcohol, you can have 'Age OK' and 'Age Verify' buttons on the keyboard. If the customer is obviously an adult, the operator presses the 'Age OK' button and the word 'Verified' appears on the receipt and audit roll. Where it is necessary to ask for ID, the customer's birth date and the word 'Verified' appear on the receipt and audit roll as proof that the law has been observed.

## Back up security

SX-595's program and sales information can be backed up on an SD card inside the machine. Should the SX-595 cease to function for any reason - for example, during an electrical storm - sales and program data can very simply be reloaded. - Requires optional SD socket pcb.

## Powerful Management Reporting

A wide choice of clear, concise Management reports provides the information you need to control your business. A series of preselected Reports can be programmed to print out at the touch of a button. They include Best/Worst Sellers, Non-Movers and a Re-order report.

**Available to buy or rent with full maintenance cover.**

**All machines supplied fully programmed and customised to your requirements.**

**As standard, the SX-595 meets most retailing requirements, including simple stock control. But linking SX-595 terminals to a back office PC, located in-house or remotely, provides an integrated EPOS solution.**

## Stand-alone Scanning and Stock Control with re-order levels

Where there are simple stock control requirements, SX-595 can be a complete stand-alone system with up to 20,000 product lines - ideal for retailers who want the benefits of a scanning system like those used by major retailers but without the cost and sophistication of a PC-based system.

## Scanning with Back Office Stock Control

Your system's flexibility and power can be considerably increased by linking the SX-595s at the points of sale to a back office PC that can be in-house or located remotely.

**Two simple-to use software packages have been specifically developed to increase the performance and power of your SX-595 system : -**

## Geller Sales & Management Software

David Sales Manager controls all aspects of programming and enables you very simply to change prices and product names. David collects and consolidates trading information from all SX-595s in the business (in-house or at remote sites) and presents it in easy-to-read reports for management.

## Geller Stock Control Software

Single or multi-site SuperStock retailing software is widely used where full inventory control and purchase ordering are required. Powerful, management reporting, customised to your needs, improved margin control and reduced operating costs are just a few of SuperStock's many benefits.

## Specification:

Power consumption 40W maximum

Memory back-up approx 700 hours

## Dimensions:

Width: 410mm - Depth: 415mm - Height: 188mm

(256mm high with rear display up)

Weight: 13.1 kg (including cash drawer)
