

Innovation through experience

SX-695

An ECR from the SX Professional Series

Powerful performance and elegant design for bars, pubs & clubs

- *Elegant low profile*
- *Fast, silent printing*
- *2-sided alphanumeric display*
- *IRC Communication enables floating clerk operation*

SMART SYSTEMS THAT DO MORE - COST LESS
GELLER ELECTRONIC CASH REGISTER TERMINALS

The SX-695 can operate as a completely stand-alone hospitality terminal or be linked to the back office. Up to eight SX-695s can be linked to each other in the same system for consolidated management reporting.

Displays:

The 10 digit alphanumeric front and rear displays describe all items by name and give user-friendly prompts to operators to ease and speed service. The rear display can be raised and rotated to the best viewing position.

Fully customisable Keyboard:

The machine has a 'soft' 173-position flat, spill-resistant keyboard which can be tailored to exactly match the features and layout that suits your business.

Inter-register communication

Where there are several sales points, the SX-695s can be linked to each other, thus allowing clerks to 'float' around the network. Information - for example, new products or price changes - entered onto one SX-695 are sent automatically to the other SX-695s in the system. In the other direction, sales data from all the SX-695s in the business can be consolidated onto one SX-695 for easy management reporting.

Drop and Load Silent Printer:

The SX-695's noiseless 16 digit alphanumeric printer operates at 13 lines per second. The hi-tech 'drop and load' mechanism with separate 58 mm thermal receipt and audit rolls, simplifies and speeds paper roll changes and eliminates paper jams. There is no ribbon to replace or fade, so receipts of the same exceptional clarity are produced every time. Your company logo or special design can be printed on the top of each receipt.

Powerful Management Reporting:

A wide choice of clear, concise Management Reports provides the information you need to control your business. A series of pre-selected Reports can be programmed to print at the touch of a button.

Some of the many programmable choices:

- Automatic Backup of program and sales information
- Password protected sign-on for clerks
- Clerk Interrupt (several clerks can use the SX-695 at the same time) & floating clerks
- Scroll back/scroll forward with error correction
- Drawer Alarm with programmable time delay
- Quick & easy price change
- Up to 20,000 Price Look Ups
- Up to 40 Clerks by ID number, compulsory clerk ID
- Training mode for new staff
- 3 RS232 communication ports for linking to a PC, a bar code scanner or a scale.

Available to buy or rent with full maintenance cover.

All machines supplied fully programmed and customised to your requirements.

As standard, the SX-695 meets most hospitality requirements, including simple stock control. But linking SX-695 terminals to a back office PC, located in-house or remotely, provides an integrated EPOS solution.

Geller Sales and Management Software

David Sales Manager controls all aspects of programming in-house or remotely. It enables you to change prices/product names. David collects and consolidates trading information from all SX-695s in the business, in-house or at remote sites, and presents it in easy-to-read Reports for Management.

Geller Stock Control Software

Single or multi-site, SuperStock Hospitality Software is widely used where full inventory control, menu explosion and purchase ordering are required.

Powerful management reporting, customised to users' needs, improved margin control and reduced operating costs are just a few of SuperStock's many benefits.

Hardware Options:

- Magnetic ibutton reader for clerks
- Up to 8 SX-695's can be linked by IRC
- Cash drawer can be remotely sited

Specification:

Power consumption 35 watts maximum
Memory back up approx. 720 hours
Dimensions: 410mm(W) x 415mm (D) x 188mm(H)
(254mm with rear display up) - Weight: 13.1 kg.
