- Table Reservations
- Clerk Interrupt
- Floating Clerks
- Clerk Security with iButtons
- Kitchen/Bar Printers
- Simple Programming
- Mix & Match Promotions
- Customer Accounts
- Time & Attendance
- Loyalty/Cashless System
- Barcode Scanning
- Shelf Edge Label Printing
- Links to Back Office Software
- Scale Link
- Change Dispenser Link
- Chip & PIN

For Retailers

ICRTouch is widely used in the retail sector and a number of high street establishments including bakers, chemists, convenience stores & specialist retailers are benefiting from the functionality of the software. With a retail operation in mind, ICRTouch is able to offer:

Scale Link

ICR have developed a certificated scale link that allows an epos terminal to interface with Avery's FX120 checkout scale using ICRTouch.

Label Printing

Barcode and Shelf Edge labels can be printed from the TMS back office software or simple Shelf Edge Labels on the epos terminal.

Barcode Scanning

Barcode scanning is available via a wide variety of scanners including hand-held and presentation.

Change Dispensing

Reduce transaction times and cash loss via genuine errors with the fully automated Telequip T-Flex coin dispenser and ICRTouch. Using this solution gives the correct change - every time!

Chip & PIN

An integrated Chip and PIN solution is available with ICRTouch using a bureau service provider. A chip & pin pad can be directly connected to a terminal with a receipt printer or a hand-held bluetooth device is available. A fast & reliable broadband connection at site is required for the credit card authorisation.

HHT Stocktaking

Using a hand-held terminal with TMS, a customer is able to utilise an integrated stock taking process using the barcode labels on the product.

It also offers your business..

- X and Z Readings – Multiple level X and Z readings offering you the ability to decide what information you wish to print.
- Takings Management – Analyse the days takings by payment type, staff, and department or group.
- Customer Loyalty System – You can give customers loyalty cards and then they can accrue loyalty points.
- Time and Attendance – Allows staff to clock in and out at the terminals. Will also record breaks. When the member of staff makes their first sale, the system will check if they have clocked in and if not do so automatically.
- Customer Membership Data – You can store a database of customers or club members. You can even store a picture of the individual.
- Staff Security with 'ibuttons' – Staff can either log in for a sale by keying in a number or by using the industry standard 'ibuttons'.

For Hospitality

ICRTouch offers the most comprehensive hospitality touchscreen software system available on the market.

The ICRTouch epos system offers you control of :

- Table Billing System – Orders can be posted to tables which can be viewed on the screen by touching a picture of the table.
- Bill Printing – System will print normal bills, calculate 'Split' bills or 'Dutch' Bills
- Table Reservations – Reserve tables via a screen based diary system.
- Table Planning – System can hold several table plans allowing you to number and position your tables as you wish in any of the 'rooms' you wish.
- Happy Hour – You can set-up automatic re-pricing of items to be changed at certain times.
- Multiple Kitchen & Bar Printers – Each item sold can be instructed to print to a specific printer. This allows starters to go to one printer, mains to another etc. You can even print the drink orders at the bar.
- Hotel PMS Interface – You can send the bills to most of the popular Hotel PMS packages.
- Waiter Order Pad – Using a handheld terminal orders can be taken at the table.

Back Office Software

ICR's back office management software TMS automatically collects detailed sales information from your epos system, either at your premises, via the internet or over a standard telephone line. Reports can be called up on the computer screen, printed, or exported to other software packages, such as Excel. The software will allow you to program and maintain your touchscreen terminals, poll the sales data and provide stock control.

Available to buy or rent with full support.
