

EPOS Systems

TX870 / DX890

Uniwell touchscreens are cost effective touch-screen terminals based on the powerful & proven HMS (Hospitality Management System) firmware. The flexibility of the software enables the touchscreens to be configured to meet the operational requirements of pubs, restaurants, cafes, bars, nightclubs, hotels, fast-food and leisure operators.

The touchscreens take advantage of the latest colour screen technology to provide operators with a high brightness display that has an excellent viewing angle. With a small footprint and an adjustable customer display

the touchscreens can be front or back bar mounted.

Designed for ease of use the system significantly reduces training times. Operators are led through transactions, prompting them to select options such as cooking instructions or side orders. Screens can be configured to encourage staff to sell up or promote sales of products with a particularly high margin.

The system promotes good customer service and it also significantly reduces transaction times. Multiple

operators can concurrently use the system. Simply touch the screen to select any course and you will instantly be presented with a new "keyboard" containing only these items. The system is ideal for extensive or complicated menus that have a variety of choices and options.

Both the TX-870 and DX-890 touchscreens provide a low cost solution with 10.4" screens.

Key Features

Flexible Billing System

Designed to be configurable the system can handle bar tabs & table numbers, rooms, split billing and table transfers.

Menu Buttons

For operators with large or complicated menus, individual buttons can be set-up to display a list of items for selection. Buttons could be set-up for starters, main courses and desserts for example. The set menu function caters for fixed price meals with a choice of courses.

Intelligent Prompting

Intelligent prompting and sub menus lead operators through transactions ensuring a speedy and accurate registration of orders. For example the registration of a steak order will automatically prompt for cooking instructions rare, medium etc. and any associated side orders.

Kitchen Control

Automatic transmission of food and drink orders, together with preparation instructions to kitchen and dispense areas.

About Uniwell

Uniwell UK is a leading distributor of cash registers & EPOS hardware and peripherals. Uniwell have been supplying EPOS systems to the hospitality and retail markets for over 25 years and are part of the Uniwell Corporation global distribution network.
